## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lynn, U.S. 1,238,165 in view of Burd et al., U.S. 6,026,904

Regarding claim 1 Lynn discloses a production string (3), a funnel (1), an annulus (at generally at 4), a packer means (2) above the funnel and a tube (5) having an inlet (at 6) communicating with the annulus and an outlet communicating with the production bore. Lynn discloses an uncased wellbore. Burd teaches use of a cased wellbore (14) to stabilize the subterranean zone. it would have been obvious to one having ordinary skill in the art at the time of the invention to arrange for the wellbore disclosed by Lynn to be cased as taught by Burd et al. to stabilize the formation since the use of a casing in a wellbore is well known in the art.

As to claim 2, Lynn discloses a restrictive orifice (upper portion of 5 at production bore).

As to claim 3, Lynn discloses the bottom inlet (3 below 4) of the funnel is spaced below the packer (2).

### *Allowable Subject Matter*

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or suggest all the claimed subject matter including the outlet of the tube spaced above the bottom end of the funnel.
